

Data Analysis on PUBG Data with Excel,MySQL,R,Tableau

Players Unknown Battleground(PUBG) has taken the gaming world by storm , offering an Immersive battle royale experience . Beyond its gaming aspect , PUBG also provides a wealth Of data that can be mined and analyzed to gain insights into player behaviour , strategies , And performance.

Dataset Description:

Provide an overview of the PUBG dataset, including the types of data it contains (Player name , Player Kills , Player damage , Player Survival Time , etc.).

Data Preparation:

1. Data Loading:

- Excel: Import the PUBG dataset into Excel.
- MySQL: Load the dataset into a MySQL database.
- R: Use R to read and store the dataset.

2. Data Cleaning:

- Handle missing values, outliers, and any inconsistencies in the dataset.

Exploratory Data Analysis (EDA):

1. Descriptive Statistics:

- Excel: Utilize Excel functions for basic statistics (mean, median, etc.).
- MySQL: Run SQL queries to obtain summary statistics.
- R: Use R functions for descriptive statistics.

2. Visualization:

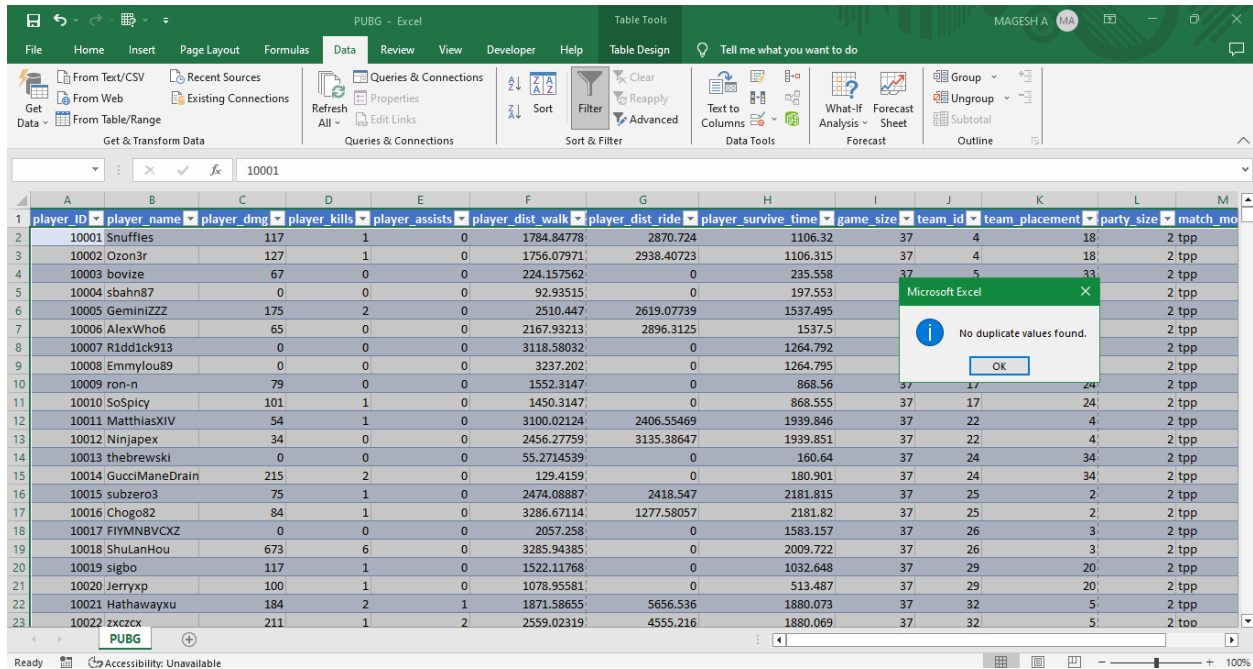

- Tableau: Import data and create interactive visualizations for deeper insights.

Data Cleaning

After uploading the CSV file to the Microsoft Excel and successfully done the Data cleaning process through Data Validation , Removing Duplicates , Removing null values

,etc.

Dataset -> [click here](#)

The screenshot shows a Microsoft Excel spreadsheet titled 'PUBG - Excel'. The data is organized in columns with headers: player_ID, player_name, player_dmg, player_kills, player_assists, player_dist_walk, player_dist_ride, player_survive_time, game_size, team_id, team_placement, party_size, and match_moment. The rows contain numerical data for various players. A message box from Microsoft Excel is overlaid on the data, stating 'No duplicate values found.' with an 'OK' button.

	A	B	C	D	E	F	G	H	I	J	K	L	M

is.null

The R function `is.null` indicates whether a data object is of the data type `NULL` (i.e. a missing value). The function returns `TRUE` in case of a `NULL` object and `FALSE` in case that the data object is not `NULL`.

```
is.null(PUBG$player_ID)
```

```
## [1] FALSE
```

```
is.null(PUBG$player_name)
```

```
## [1] FALSE
```

```
is.null(PUBG$player_dmg)
